- Access to Mainland China
- Global Private Network Available
- Top Internet Carriers
- Inter-connectivity with Singapore & Amsterdam

# Hong Kong (NSHKG01): Your Access to Mainland China

## Access to Mainland China

The Great Firewall of China is the reason why your online business cannot be accessed by 1.3 billion people in Mainland China. Scaling your infrastructure in our Hong Kong Datacenter will ensure that your website and platform is able to serve the population in Mainland China.

## Physical Security

Our new Data Center in Hong Kong is protected against physical intrusion and is equipped with sophisticated multi-level access control systems, including CCTV cameras, biometric access, and ID check systems.

## Presence of 5 Top Carriers

A crucial feature of a data center is its access to the main channels of top internet carriers to ensure fast network performance and high network availability. Our Hong Kong Data Center is connected with 5 Top Internet Carriers: Centurylink, China Unicom, HKIX, NTT and PCCW Global.

## Private Cloud Enabled

Our network & infrastructure topology in the Hong Kong Datacenter have been designed and deployed to accommodate private cloud environments via multiple virtualization technologies and platforms.

## Competitive Bare-metal Servers Pricing

Despite the fact Hong Kong is one of the most expensive locations for hosting, NetShop ISP has made numerous deals with suppliers and internet carriers so that we can provide the most competitive prices for you.
