Singapore; Your Pass to Access the Asian Market

Physical Security

The Singapore Data Center is protected against physical intrusion and is equipped with sophisticated multi-level access control systems, including CCTV cameras, biometric access, and ID check systems.

Connected with the Top Internet Carriers

A crucial feature of a data center is its access to the main channels of top internet carriers to ensure fast network performance and high network availability. Our Singapore Data Center is connected with 4 Top Internet Carriers: NTT, PCCW, Telia and Telin.

Instant Provisioning Virtual Servers

Our Virtualization infrastructure has been expanded so that the Flexi VPS product is available for new deployments in Singapore.

Pre-built & Custom Dedicated Servers

We maintain a large capacity of DELL Servers in our Singapore Data Center in order to fulfill orders of

any kind. Pre-built Dedicated Servers will be provisioned within 8 hours through our Smart Provisioning deployment system.

Low latency to Asia

Hosting in our Singapore Data Center can help you penetrate the Asian Market. As per the connectivity routing that passes from this location, you will benefit from very low latency with all Asian countries and the major European Internet Hubs.

Data Center Features

- Tier III & Tier IV
- ISO27001 & PCI-DSS Certified
